El examen consta de 3 Bloques (A, B y C)

En cada bloque (**Comprehension, Use of English y Writing**) se plantean varias preguntas, de las que deberá responder al número que se indica en cada uno. En caso de responder a más cuestiones de las requeridas, serán tenidas en cuenta las respondidas en primer lugar hasta alcanzar dicho número. Las preguntas han de ser respondidas en su totalidad: si la pregunta tiene dos secciones, hay que responder ambas.

BLOQUE A (Comprensión lectora)

Puntuación máxima: 4 puntos

Debe responderse a las 8 preguntas de uno de los 2 textos propuestos.

I * COMPREHENSION (4 points). CHOOSE TEXT 1 OR TEXT 2 AND ANSWER ALL THE QUESTIONS FROM THAT TEXT ONLY.

TEXT 1: SEARCH FOR EXTRATERRESTRIAL LIFE GOES IN ALL DIRECTIONS *KEY*

1 The US Congress recently asked the National Academies of Sciences, Engineering, and Medicine for a report on the future of
2 space exploration. Among other things, the report calls on NASA to look for signs of alien life in every future space mission. Now
3 that we have discovered thousands of new Earth-like planets, the study argues, we should always be alert for signs of
4 extraterrestrial life, or biosignatures. Accordingly, it urges the US space agency to develop "flight-ready instruments" and imaging
5 systems to carry out the search. NASA's response has been to fund a research team specialized in biosignatures with \$7 million
6 to start working on such explorations.

7 Meanwhile, the Trillion Planet Survey, a new project at the University of California Santa Barbara, is using extremely
8 sophisticated software to process images of the Andromeda galaxy. It's looking for evidence of optical signals from faraway
9 civilizations, instead of the radio waves we have been listening for since the early 1960s. In turn, the US Congress has been
10 considering whether it should again start funding the Search for Extraterrestrial Intelligence project (SETI) after 25 years of
11 indifference.

12 And then there is Donald Trump's call for the creation of Space Force, a new branch of the US military. The American president
13 has suggested that there's a need to safeguard the world in case other powers like Russia and China decide to start a war outside
14 the atmosphere. But conspiracy theorists aren't convinced. They think the real purpose of Space Force is to fight off a possible
15 alien attack.

TEXT 2: GRETA THUNBERG: OUR HOUSE IS ON FIRE *KEY*

- 1 I have some good and some bad news regarding the climate emergency. I will start with the good news. The world will not end
2 in 11 years, as a small number of people have been saying lately. The bad news, however, is that around the year 2030 the climate
3 breakdown will be completely irreversible, if we don't change the way in which we are doing things.
4 A lot of people don't agree with what we, young children, are saying. They say that we are exaggerating, that we are alarmists.
5 But the climate and ecological emergency is right here, right now. In the Paris agreement we have only signed up for staying below
6 1.5 to 2 degrees of temperature rise, while the latest scientific report shows that if we aim lower, the impact on climate will be
7 significantly reduced and countless human lives will be saved.
8 Now political leaders in some countries are starting to declare climate emergencies, and that is good. But the changes required
9 are still nowhere in sight. And the biggest danger is not our inaction. The real danger is that companies and politicians are making
10 it look like real action is happening, when in fact almost nothing is being done.
11 We cannot solve the crisis without treating it as a crisis, without considering the full picture. We are in a real emergency: richer
12 countries should get down to zero emissions as soon as possible, while poorer countries need more energy to provide clean
13 drinking water to their citizens and build some of the infrastructure that we already have, such as roads, hospitals, electricity and
14 schools. The climate emergency has only just begun, and it will get worse.

CHOOSE AND WRITE THE CORRECT OPTION (A, B, C or D). (0.5 points each)

9. If the present situation continues, in a decade... *(b)*

- (a) the climate emergency will come to an end. (b) the effects of climate change will be permanent.
(c) the countries will come to an agreement. (d) the effects of climate change will be reversible.

10. According to Greta, the climate disaster... *(d)*

- (a) is an exaggeration. (b) is unlikely to happen.
(c) is an invention of pessimists. (d) is a real problem today.

ARE THESE STATEMENTS TRUE OR FALSE? JUSTIFY YOUR ANSWERS WITH THE PRECISE WORDS OR PHRASES FROM THE TEXT, OR USE YOUR OWN WORDS. (0.5 points each)

11. **The Paris agreement is enough to solve the climate issue in the future.** *FALSE (lines 5-7) "In the Paris agreement we have only signed up for staying below 1.5 to 2 degrees of temperature rise, while) the latest scientific report shows that if we aim lower, the impact on climate will be significantly reduced and countless human lives will be saved."*
12. **The necessary measures to prevent the climate problem have already been taken.** *FALSE (lines 8-9) "But the changes required are still nowhere in sight."*
13. **According to the author, the biggest threat is certain hypocritical attitudes.** *TRUE (line 9-10) "The real danger is that companies and politicians are making it look like real action is happening, when in fact almost nothing is being done."*
14. **All countries in the world should make the same effort to reduce emissions.** *FALSE (lines 11-14) "richer countries should get down to zero emissions as soon as possible, (while poorer countries need more energy to provide clean drinking water to their citizens and build some of the infrastructure that we already have, such as roads, hospitals, electricity and schools.)"*
